GitHub: https://github.com/sahilydv-1610 Mobile: +91-7889914800

Skills

- **Languages**: C++, JavaScript, Python, Java
- **Frontend & Frameworks**: Tailwind CSS, Next.js, ReactJS
- **Backend & Framework**: Node.js, Express.js, REST APIs, Laravel, REST APIs
- **Database**: PostgreSQL, MySQL, MongoDB
- **Cloud & Infrastructure:** AWS, Microsoft Azure, Google Cloud Platform, GitHub Action, NGINX, Linux
- **Concepts**: System Design, Authentication Systems, API Design
- **Soft Skills**: Problem-Solving, Team work, Project Management, Adaptability, Time management

Projects

Chit-Chat Web App (Real time Messaging Platform) Dec' 25

- Developed a real-time messaging application for featuring secure authentication and instant message propagation.
- Constructed responsive UI layouts enabling efficient message rendering and user-friendly navigation.
- Enabled live message synchronization through Firebase Realtime Database integrations.
- Modeled user presence tracking and chat data structures supporting immediate UI state updates.
- Enabled media sharing and emoji support for enhanced user interaction
- Implemented audio/video calling using WebRTC technology
- Designed responsive and modern UI with dark mode support
- Tech: React, Node JS, JavaScript, Tailwind, AJAX, Polling, WebRTC

CodeNova AI (Full-Stack AI Code Assistant) Feb' 26

- Developed an AI-powered coding assistant that generates, explains, and debugs code across multiple programming languages.
- Designed REST APIs using Node.js and Express for handling user queries and responses.
- Integrated external AI APIs for real-time code generation and problem-solving.
- Engineered RESTful APIs using Node.js and Express.js to handle user prompts and AI responses efficiently.
- Optimized performance using efficient API handling and asynchronous request processing.
- Tech: React, Node.js, Express.js, JavaScript, Tailwind CSS, REST APIs, Render

Smart Video Downloader – Multi-Platform Media Fetcher **Apr**' 26

- Built a web-based application to download videos from multiple platforms via URL input
- Developed backend logic to fetch and process video data efficiently
- Implemented quality selection options (e.g., 720p, 1080p) for downloads
- Designed fast and responsive user interface for seamless experience
- Optimized performance for quick video processing and download handling
- Automated file naming and storage system
- Tech: React, Node JS, Tailwind, APIs / Scraping logic for fetching video

Certificates

- Data structure and algorithm using java programing - Cipher School - Link Jul' 25
- Cloud Computing - NPTEL - Link Apr' 25
- The Bits and Bite of Computer Networking – Google - Link Sep' 24
- AI Essential For Beginner - Infosys - Link Aug' 25

Achievements

- Solved 300+ DSA problems on Leetcode using developing strong analytical and problem-solving skills with a focus on dynamic programming, database querying, hash tables, and string manipulation.
- Demonstrated strong command over Frontend & Backend performance optimization and distributed architecture design.

Education

- **Lovely Professional University** Phagwara, Punjab
  Bachelor of Technology - Computer Science and Engineering; ***CGPA: 6.5*** *Aug' 23 - Present*
- **Yaduvanshi Shiksha Niketan** Narnaul, Haryana
  Intermediate (PCM); ***Percentage: 78.2*** *Apr' 22 – Mar' 23*
- **Yaduvanshi Shiksha Niketa** Narnaul, Haryana
  Matriculation; ***Percentage: 70*** *Apr' 20 – Mar' 21*
